

## Operations Production Planner Vibe-X (m/f/d)

### Job Description Summary

Today, Lonza is a global leader in life sciences operating across three continents. While we work in science, there's no magic formula to how we do it. Our greatest scientific solution is talented people working together, devising ideas that help businesses to help people. In exchange, we let our people own their careers. Their ideas, big and small, genuinely improve the world. And that's the kind of work we want to be part of.

We are looking for an **Operations Production Planner Vibe-X (m/f/d)** for our location in Visp. You are responsible for the holistic operations planning in the first manufacturing facility combining Bioconjugation and Microbial Technology in one asset. This includes the coordination operational supporting activities such as production planning, resources and material management.. The continuous coordination and planning which is a cross-functional effort is done in collaboration with the Vibe-X Leadership team, Supply Chain and Material Management team, Program management and central logistic.

#### Your tasks:

- Responsible for the holistic operations planning for the Vibe-X project. Develop the planning strategy for the future commercial facility combining Bioconjugation and Microbial technology.
- Development of an integrated plan to coordinate all operational activities, such as production preparation, production planning and post production, maintenance and calibration planning as well as the coordination of major and minor plant changes including qualification activities if required.
- Coordination, support and planning of the tasks and requirements of the different areas such as Procurement Planning, Operations and Quality team, Maintenance and Engineering, Global Engineering and Lonza Services.
- Develops and owns the Summary Production Schedule (SPS) which is driven by Supply Chain demand Planning and the Master Production Schedule (MPS).
- Development of detailed plans for production planning, maintenance planning, resource planning and availability of plant and equipment preferably using Scheduler PRO.
- Proactive development of strategies to anticipate or counteract possible future supply bottlenecks
- Active development of measures to improve planning accuracy (process and system optimizations)
- Development, maintenance and training/compliance on the scheduling tool/system and its use in executing operations in the facility.

#### Your Profile:

- Bachelor's or Master's degree in supply chain or biotechnology or corresponding training qualification
- Several years of experience in supply planning in pharmaceuticals or biotechnology, or in planning other complex projects (e.g. CAPEX)
- Professional experience in production environment (GMP)
- English business fluent, German is a plus
- Good SAP knowledge in the area of production planning in the pharmaceutical/process industry
- Proficient knowledge of Office programs, especially MS Project
- Experience on scheduling/capacity optimization programs is also desirable.

Every day, Lonza's products and services have a positive impact on millions of people. For us, this is not only a great privilege, but also a great responsibility. How we achieve our business results is just as important as the achievements themselves. At Lonza, we respect and protect our people and our environment. Any success we achieve is no success at all if not achieved ethically.

People come to Lonza for the challenge and creativity of solving complex problems and developing new ideas in life sciences. In return, we offer the satisfaction that comes with improving lives all around the world. The satisfaction that comes with making a meaningful difference
