

# Lonza

## Analytical Chemist QC Pharma 80-100% (m/w/d)

### Job Description Summary

Today, Lonza is a global leader in life sciences operating across three continents. While we work in science, there's no magic formula to how we do it. Our greatest scientific solution is talented people working together, devising ideas that help businesses to help people. In exchange, we let our people own their careers. Their ideas, big and small, genuinely improve the world. And that's the kind of work we want to be part of.

We are currently looking for an additional team member for our Quality Control (QC) team within the growing Small Molecules Business in Visp. You will contribute to the development, implementation of analytical procedures and processes and support ongoing productions of Active Pharmaceutical Ingredients for our customers.

Key responsibilities:

- Coordinate and execute QC work for a laboratory or a project (scheduling, equipment, coordination with associated services, on time release of raw materials, intermediates, APIs)
- Review of laboratory data
- Collect and summarize data to prepare reports and make presentations
- Contribute to a scientific field or technique by solving scientific problems
- Represent the team in group and project team meetings
- Implementation of trends and innovations in the area of expertise.

Key requirements:

- Recent Graduate (BSc or MSc), who is looking for a chance to gain first work experience
- Good communication skills to exchange complex information and a team player personality
- Fluent German and English
- Strong IT skills
- Nice-to-have: GMP experience

Every day, Lonza's products and services have a positive impact on millions of people. For us, this is not only a great privilege, but also a great responsibility. How we achieve our business results is just as important as the achievements themselves. At Lonza, we respect and protect our people and our environment. Any success we achieve is no success at all if not achieved ethically.

People come to Lonza for the challenge and creativity of solving complex problems and developing new ideas in life sciences. In return, we offer the satisfaction that comes with improving lives all around the world. The satisfaction that comes with making a meaningful difference.
