

CAPEX Lead Infra Projects Visp

Job Description Summary

Today, Lonza is a global leader in life sciences operating across three continents. While we work in science, there's no magic formula to how we do it. Our greatest scientific solution is talented people working together, devising ideas that help businesses to help people. In exchange, we let our people own their careers. Their ideas big and small, genuinely improve the world. And that's the kind of work we want to be part of.

Lonza in [Visp](#) is looking for a CAPEX Lead for Infrastructure Projects. The CAPEX Lead is responsible for the design, execution and hand-over of large Capex investment projects in SGIE Engineering Services Visp within safety, cost, schedule, quality and functionality. This includes the capability to manage and to provide the leadership to interdisciplinary project teams as well as the capability to interact with the senior management. This role is at a Senior Manager level and has operative leadership of large infrastructure projects in the range of CHF 20 – 160 MM.

Key responsibilities:

- Deliver capital projects on schedule, within budget and according to specifications / functionality.
- Conduct regular engineering and project control reviews with the project team in order to ensure that the project execution is on track and to identify and implement remedial action in case of any deviation from project objectives.
- Ensure that the adequate project control systems needed to manage the risk, cost and schedule are timely in place.
- Support the evaluation and set-up of capital projects by providing Engineering support and developing the project execution strategy and the contractual framework.
- Has accountability for assigned projects / engineering work, including adequate staffing, coaching and supervising of project teams in matrix organizations.
- Ensure the implementation of the state-of-the-art technical solutions and compliance with internal and external quality, safety and ecology standards.
- Ensure the successful hand-over of the projects to the user-teams including the right level of training and correct documentation.

Key requirements:

- Extensive engineering experience thereof some years in capital projects in international environment
- Successful project management and leadership experience on major investment projects in international environment
- Excellent project management skills including contract management
- Broad project controlling and project appraisal knowledge
- Extended HSE knowledge
- Fluency in German and English is required

Every day, Lonza's products and services have a positive impact on millions of people. For us, this is not only a great privilege, but also a great responsibility. How we achieve our business results is just as important as the achievements themselves. At Lonza, we respect and protect our people and our environment. Any success we achieve is no success at all if not achieved ethically.

People come to Lonza for the challenge and creativity of solving complex problems and developing new ideas in life sciences. In return, we offer the satisfaction that comes with improving lives all around the world. The satisfaction that comes with making a meaningful difference.
