

Chemiker(in) F&E

Job Description Summary

Today Lonza is a global leader in life sciences. We are more than 15,000 employees in more than 100 locations around the world. While we work in science, there's no magic formula to how we do it. Our greatest scientific solution is talented people working together, devising ideas that help businesses to help people. In exchange, we let our people own their careers. Their ideas, big and small, genuinely improve the world. And that's the kind of work we want to be part of.

For our site in [Visp](#) we are looking for a highly skilled organic chemist within the API Development Services with a strong interest in the development of manufacturing processes for the production of small molecules API's.

Key responsibilities

- Develop and optimize scalable processes regarding productivity, safety, quality and cost efficiency for the production of small molecules API (incl. HPAPI) in the laboratory through all phases of clinical development up to Process Validation.
- Transfer of production processes to the GMP manufacturing facility and support of the manufacturing plant during production in case of issues and difficulties (e.g. trouble shooting) as technical expert.
- Plan, supervise, and evaluate laboratory experiments and summarize results in reports and presentations.
- Collaborate within Lonza's multifunctional project Teams and external customers
- Anticipate, evaluate and implement trends and innovations in the area of expertise

Key requirements

- Ph.D in Organic Synthesis, industry experience not essential but is an advantage
- Knowledge of cGMP regulations, statistical data evaluation and DoE are desirable
- Structured, focused, well-organized working attitude, open-minded for new ideas and suggestions, highly motivated, creative and solution-oriented.
- Strong team player
- Excellent communications skills and soft skills to build solid relationships
- Fluent in German and English

People come to Lonza for the challenge and creativity of solving complex problems and developing new ideas in life sciences. In return, we offer the satisfaction that comes with improving lives all around the world. The satisfaction that comes with making a meaningful difference.
