

Chemist, Chemical Engineer, PAT Expert-000004HV

Beschreibung We are looking for a flexible and highly motivated employee to lead the PAT (Process Analytical Technology) laboratory, and who brings know-how in automation as well as experience in the field of online analysis. You will be responsible for coordinating the technical equipment, performing feasibility studies, leading PAT projects in the laboratory, and supporting implementations in production.

The main tasks involve experimental design, selection of a suitable measuring technique, method development, data analysis, and project organisation.

Qualifikationen Master, Diploma or PhD degree in chemistry or chemical engineering with a minimum of four (4) years of experience in automatisisation technologies and optical spectroscopy, and a good understanding of multi-dimensional data sets. Basic knowledge in organic syntheses is a must.

Your high flexibility allows you to be open for new technologies and ideas. You enjoy working independently but are a team-oriented person, capable of handling multiple projects at the same time. Strong communication skills as well as a good command of German and English round off your personal profile.
