

Development Scientist (m/f/d) Downstream Purification Development

Job Description Summary

Today, Lonza is a global leader in life sciences operating across three continents. While we work in science, there's no magic formula to how we do it. Our greatest scientific solution is talented people working together, devising ideas that help businesses to help people. In exchange, we let our people own their careers. Their ideas, big and small, genuinely improve the world. And that's the kind of work we want to be part of.

We are currently looking for a Development Scientist (m/f/d) to join our DSP Development (Downstream Process Development) team in Visp, Switzerland.

The Development Scientist collaborates closely with project teams and is responsible for the planning and execution of the experimental work.

Key responsibilities:

- Establishes the protocols and planning for the laboratory experiments
- Ensures appropriate project documentation and reporting including customer contact and presentation in partnership with the project leader
- Work closely with Project Leaders and can act as a substitute project leader
- Supports the DSP team in her/his field of expertise (e.g. chromatography, filtration & statistical analyses)

Key requirements:

- M.S. or B.S. degree in biotechnology or related field with working experience
- Profound knowledge in the areas of protein chemistry, chromatography, purification and filtration
- Experience with statistical analysis, late phase or bioinformatics is of advantage
- You are positive, flexible, reliable, proactive and a good team player
- Good written and oral communication skills in English and German

Every day, Lonza's products and services have a positive impact on millions of people. For us, this is not only a great privilege, but also a great responsibility. How we achieve our business results is just as important as the achievements themselves. At Lonza, we respect and protect our people and our environment. Any success we achieve is no success at all if not achieved ethically.

People come to Lonza for the challenge and creativity of solving complex problems and developing new ideas in life sciences. In return, we offer the satisfaction that comes with improving lives all around the world. The satisfaction that comes with making a meaningful difference.
