

Functional Lead Site Infrastructure Project Delivery & Shared Technologies

Job Description Summary

Today Lonza is a global leader in life sciences. We are more than 15,000 employees in more than 100 locations around the world. While we work in science, there's no magic formula to how we do it. Our greatest scientific solution is talented people working together, devising ideas that help businesses to help people. In exchange, we let our people own their careers. Their ideas, big and small, genuinely improve the world. And that's the kind of work we want to be part of.

Lonza in [Visp](#) is looking for a Functional Lead Site Infrastructure Project Delivery & Shared Technologies. This is a Senior level position with the responsibility for planning and delivering a portfolio of the Visp Site Infrastructure (SI) Capex Projects in a range of 40-60 mCHF/year, as well as the responsibility to globalize and standardize Lonza's shared technologies in the areas of HVAC & Clean Rooms, Clean Utilities, etc.

You will be responsible for the direct coordination and management of the SI Project Delivery Team and the Subject Matter Experts in Shared Technologies. You will have strong links and interaction with the Visp Site Leadership and SGIE Project Teams for the definition and implementation of SI Projects. A part of your job will be the collaboration and interaction with the global SGIE Project Teams for shared technologies.

As a member of the Visp Engineering Shared Services leadership team, this role will work extensively with different SGIE Platforms and Projects and Capex Leads in Visp.

Key responsibilities:

- Lead a team of experts in Engineering, Project Management and Project initiation delivering SI Capex Projects for Visp.
- Ensure that this team is fully aligned with Site, Operations and SGIE stakeholder needs.
- Be accountable for the delivery of SI Projects on time, in scope and in budget.
- Manage the planning and budgeting for SI Visp Capex Projects
- Lead a team of SME's in collaboration with SGIE Platforms to set up and provide the global strategy for standardization in the area of shared technologies, e.g. HVAC & Clean Rooms, Clean Utilities, etc.
- Ensure that the standards are followed and implemented throughout Lonza's SGIE Platforms.
- Provide innovative solutions by design to ensure that (1) Visp Site Infrastructure and (2) global Shared Technologies remains competitive.
- Other short term activities within the SGIE-Shared Services team.

Key requirements:

- Engineering Degree, post graduate qualification preferred.
- Extensive experience in defining and managing large, complex construction projects.
- Experience in pharma/GMP environment preferred
- Strong organizational skills and experience managing teams.
- Familiarity with shared technologies (HVAC, Clean Rooms, Clean Utilities)
- Fluent in German and English
- Demonstrates strong communication and teamwork skills, particularly in stressful situations.
- High energy levels with a passion for what you do.

Lonza

Every day, Lonza's products and services have a positive impact on millions of people. For us, this is not only a great privilege, but also a great responsibility. How we achieve our business results is just as important as the achievements themselves. At Lonza, we respect and protect our people and our environment. Any success we achieve is no success at all if not achieved ethically.

People come to Lonza for the challenge and creativity of solving complex problems and developing new ideas in life sciences. In return, we offer the satisfaction that comes with improving lives all around the world. The satisfaction that comes with making a meaningful difference.
