

Global Master Data Domain Owner

Job Description Summary

Today Lonza is a global leader in life sciences. We are more than 15,000 employees in more than 100 locations around the world. While we work in science, there's no magic formula to how we do it. Our greatest scientific solution is talented people working together, devising ideas that help businesses to help people. In exchange, we let our people own their careers. Their ideas, big and small, genuinely improve the world. And that's the kind of work we want to be part of.

For our site in [Visp](#) we are looking for a Global Master Data Domain Owner. You will assume responsibilities in improvement, development of the Master Data management process and maintenance of the Master Data quality.

Key responsibilities:

- Implement a multi-level program (Governance, Data Model, Process, Organisation, Tools, Authorization, Consistency checks and live cycle, build network) in a specific domain.
- In related domains, the Global Domain Owner gather the necessary knowledge and keep it up-to-date to make sure business processes and reports are optimal supported.
- is responsibility to set the right priorities in the relevant domain and make sure the influence on other systems and domains as well as on processes and reports is checked.
- Represent the Global Master Data Team in global projects of various functions and makes sure the standards are implemented. Has to represent several related Master Data in those projects.
- make sure the right stakeholders are part of the discussions and enables to come up with optimized solutions.
- deals with escalations and challenges that is escalated from his stakeholders or the business or the enabling functions.
- In some cases, the domain owner also leads virtual global teams.

As a member of the Global Master Data team, you will be able to learn SAP Materials Management (MM) and Sales & Distribution (SD) modules, key business processes as well as data structures.

Overall, you will interact with many different departments and experts across the company worldwide.

Key requirements:

- You have a Bachelor or Master degree in data or computer science, business information technology, mathematics or business administration.
- You have an understanding of data structures or experience with databases.
- You are fluent in English. German and any additional language will be an appreciated asset.
- You are interested in continuous improvements of processes, IT tools and innovative solutions.
- You are interested in being a reliable team member in a multi-cultural environment.

People come to Lonza for the challenge and creativity of solving complex problems and developing new ideas in life sciences. In return, we offer the satisfaction that comes with improving lives all around the world. The satisfaction that comes with making a meaningful difference.
