Lonza

Internship Global Master Data Analyst

Job Description Summary

Today Lonza is a global leader in life sciences. We are more than 15,000 employees in more than 100 locations around the world. While we work in science, there's no magic formula to how we do it. Our greatest scientific solution is talented people working together, devising ideas that help businesses to help people. In exchange, we let our people own their careers. Their ideas, big and small, genuinely improve the world. And that's the kind of work we want to be part of.

To support our Global Master Data Management Department we offer the following internship at our location in Visp for the period from February 2021 to July 2021.

Key responsibilities:
You will assume responsibilities in improvement, development of the Master Data management process and maintenance of the Master Data quality:

- Data analysis and visualization
- Mass changes and data migrations
- Definition of specifications for process improvements and tests of new functions
- Reports and queries for the team or the business

Key requirements:

- Bachelor or Master degree in data or computer science, business information technology or mathematics
- Understanding of data structures or experience with databases
- Fluent in English. German and any additional language will be an appreciated asset
- Interested in continuous improvements of processes, IT tools and innovative solutions
- Interested in being a reliable team member in a multi-cultural environment.

Option: We also offer the possibility to do a Bachelor or Master project on Master data topics.

People come to Lonza for the challenge and creativity of solving complex problems and developing new ideas in life sciences. In return, we offer the satisfaction that comes with improving lives all around the world. The satisfaction that comes with making a meaningful difference.
