

Lonza

Junior QA Manag Microbial Manufacturing 70% (m/f/d)

Job Description Summary

Today Lonza is a global leader in life sciences. We are more than 15,000 employees in more than 100 locations around the world. While we work in science, there's no magic formula to how we do it. Our greatest scientific solution is talented people working together, devising ideas that help businesses to help people. In exchange, we let our people own their careers. Their ideas, big and small, genuinely improve the world. And that's the kind of work we want to be part of.

We are looking for a motivated Junior QA Manager to participate the QA Microbial team in [Visp](#). In this role you are responsible for deviation management, change control and release of Master Batch records. Embedded in the breathtaking nature we will offer a great place to work in a growing manufacturing site in Visp (VS). This is a great position to learn and to develop your knowledge in QA to support manufacturing and to increase your experience.

Key responsibilities:

- QA support in Deviation management.
- QA support in Change management.
- Approval of Master Batch Records in close collaboration with manufacturing

Key requirements:

- Either: Degree (BSc, MSc, equivalent) in natural science
- Or: Professional Education in natural science with experience in pharmaceutical industry

Every day, Lonza's products and services have a positive impact on millions of people. For us, this is not only a great privilege, but also a great responsibility. How we achieve our business results is just as important as the achievements themselves. At Lonza, we respect and protect our people and our environment. Any success we achieve is no success at all if not achieved ethically.

People come to Lonza for the challenge and creativity of solving complex problems and developing new ideas in life sciences. In return, we offer the satisfaction that comes with improving lives all around the world. The satisfaction that comes with making a meaningful difference.
