

Junior Scientist Quality Control

Job Description Summary

Today Lonza is a global leader in life sciences. We are more than 15,000 employees in more than 100 locations around the world. While we work in science, there's no magic formula to how we do it. Our greatest scientific solution is talented people working together, devising ideas that help businesses to help people. In exchange, we let our people own their careers. Their ideas, big and small, genuinely improve the world. And that's the kind of work we want to be part of.

We are currently looking for an additional team member for our Quality Control (QC) team in Visp who will contribute to the development, implementation of analytical procedures and processes.

Key responsibilities:

- Coordinate and execute QC work for a laboratory or a project (scheduling, equipment, coordination with associated services)
- Review of laboratory data
- Collect and summarize data to prepare reports and make presentations
- Contribute to a scientific field or technique by solving scientific problems
- Represent the team in group and project team meetings
- Implementation of trends and innovations in the area of expertise.

Key requirements:

- Recent Graduate (BSc or MSc), who is looking for a chance to gain first work experience
- Good communication skills to exchange complex information and a team player personality
- Fluent German and English
- Strong IT skills
- Nice-to-have: GMP experience

People come to Lonza for the challenge and creativity of solving complex problems and developing new ideas in life sciences. In return, we offer the satisfaction that comes with improving lives all around the world. The satisfaction that comes with making a meaningful difference.
