

# Lonza

## Lab Technician, Analytical Chemistry, 60-100%

### Job Description Summary

Today, Lonza is a global leader in life sciences operating across three continents. While we work in science, there's no magic formula to how we do it. Our greatest scientific solution is talented people working together, devising ideas that help businesses to help people. In exchange, we let our people own their careers. Their ideas, big and small, genuinely improve the world. And that's the kind of work we want to be part of.

Our Quality Control Team is growing! We are looking for an additional team member to perform HPLC and CE analysis in the laboratory. You will test and validate novel HPLC and Capillary Electrophoresis methods and transfer them to other labs. You will also perform routine release testing according to GMP guidelines. You will have the chance to work in a technically and scientifically state of the art environment within a fun and dynamic team.

Key responsibilities:

- Independent execution of laboratory experiments in the Quality Control laboratory
- Perform HPLC and CE analysis
- Documentation according to GMP guidelines
- Maintenance of the lab instruments
- Troubleshooting

Key requirements:

- Technical education as Laboratory Technician, e.g. Berufslehre, CTA or BSc in Chemistry, Biochemistry or similar field
- You already have hands-on experience with HPLC and/or Capillary Electrophoresis
- You enjoy working in the lab and enjoy working with a team, in a dynamic environment
- Good communication skills in German as well as English

Every day, Lonza's products and services have a positive impact on millions of people. For us, this is not only a great privilege, but also a great responsibility. How we achieve our business results is just as important as the achievements themselves. At Lonza, we respect and protect our people and our environment. Any success we achieve is no success at all if not achieved ethically.

People come to Lonza for the challenge and creativity of solving complex problems and developing new ideas in life sciences. In return, we offer the satisfaction that comes with improving lives all around the world. The satisfaction that comes with making a meaningful difference.
