## Logistics Process Engineer (f/d/m)

### Job Description Summary

Today, Lonza is a global leader in life sciences operating across three continents. While we work in science, there's no magic formula to how we do it. Our greatest scientific solution is talented people working together, devising ideas that help businesses to help people. In exchange, we let our people own their careers. Their ideas, big and small, genuinely improve the world. And that's the kind of work we want to be part of.

You will analyze and evaluate existing processes, identify areas for improvement, and develop innovative solutions to enhance productivity. You will collaborate with cross-functional teams, including warehouse personnel, transportation managers, suppliers, and customers, to gather data, understand requirements, and implement process changes. This position offers a dynamic career path, with potential and exciting possibilities for growth and professional development.

#### Key responsibilities:

- Execution of the practical project work within a cGMP regulated environment. An implicit lead function in process execution can be assigned.
- Author, review and Implementation of process related procedures (Standard operation procedures, Reports,...).
- Identify areas for improvement, optimize operations, and ensure a smooth flow of goods throughout the supply chain.
- Reporting of non-conformances and initiation of quality issue records and low impact investigations as well as corrective actions under cGMP.
- Evaluate process performance and deviations while implementing a culture of continuous improvement within the logistics function by developing and implementing performance measurement systems, conducting regular audits, and driving lean methodologies.
- Propose new or improved technologies to enhance quality, cost efficiencies, personnel safety and regulatory compliance
- 
- Liaise with internal and external stakeholders such as Manufacturing, Site Distribution/Logistics, and Quality.

#### Key requirements:

##### Hard Skills:

- University or higher technical education qualification with several years of experience
- Desired Experience within a cGMP environment (Change Controls, CAPA's, Deviations,...). Will be considered as an advance
- Confident handling of MS-Office
- Experience with ERP Systems (desired)
- Ability to work according to tight and changing timelines
- Accurate working and documentation style
- English and/or German is a must

# Lonza

## Soft Skills:

- Good team player, competence for cross-divisional cooperation
- Independent, self-reliant and structured working style
- Can do Attitude
- Good Communication skills

Every day, Lonza's products and services have a positive impact on millions of people. For us, this is not only a great privilege, but also a great responsibility. How we achieve our business results is just as important as the achievements themselves. At Lonza, we respect and protect our people and our environment. Any success we achieve is no success at all if not achieved ethically.

People come to Lonza for the challenge and creativity of solving complex problems and developing new ideas in life sciences. In return, we offer the satisfaction that comes with improving lives all around the world. The satisfaction that comes with making a meaningful difference.
