

MSAT Readiness Expert - USP/DSP/Bioconjugates/mRNA (m/f/d)

Job Description Summary

Today, Lonza is a global leader in life sciences operating across three continents. While we work in science, there's no magic formula to how we do it. Our greatest scientific solution is talented people working together, devising ideas that help businesses to help people. In exchange, we let our people own their careers. Their ideas, big and small, genuinely improve the world. And that's the kind of work we want to be part of.

The site in [Visp, Switzerland](#) is growing and for our growing Biologics Readiness organization, we are looking for an MSAT Readiness Expert Lead in Capital Investment projects. In this position, you will be the main responsible for delivering all input required for the process capabilities of the future facilities and acts as process owner during the initial engineering phases and provides leadership to cross-functional teams.

Key responsibilities:

- Acts as MSAT Readiness Expert Lead in Capital Investment projects for construction and commissioning of Ibex® biopharma facilities
- Support time&motion and feasibility studies, conceptual and basic design phases as future process owner of those facilities
- Act as the interface between the process donor (customer/sending sites, process development) and operations; responsible to ensure process scalability and manufacturability
- Manage the process representatives during the initial engineering phases and give leadership to cross-functional teams of experts
- Support the implementation Lonza culture via openness for change and new ideas, cooperative teamwork, continuous improvement and innovation even outside the own area of responsibility
- Contributing to standardized MSAT procedures and processes in the area of local / global MSAT and Lonza Initiatives

Key requirements:

- Significant experience in the area of biopharma facilities (microbial, mammalian, bioconjugates), at least 2kL (mid-scale), preferably >10kL (large scale)
- Deep understanding of a broad spectrum of bioprocesses (USP & DSP, bioconjugates, mRNA), GMP-requirements and biopharma production
- Strong experience in CapEx and start-up phases of new biopharma manufacturing facilities
- Strong leadership skills
- Ability to communicate internally and externally at higher levels; strong business understanding, strong team orientation
- Structured and proactive working attitude
- Open-minded for new ideas

Every day, Lonza's products and services have a positive impact on millions of people. For us, this is not only a great privilege, but also a great responsibility. How we achieve our business results is just as important as the achievements themselves. At Lonza, we respect and protect our people and our environment. Any success we achieve is no success at all if not achieved ethically.

People come to Lonza for the challenge and creativity of solving complex problems and developing new ideas in life sciences. In return, we offer the satisfaction that comes with improving lives all around the world. The satisfaction that comes with making a meaningful difference.
