MSAT Senior Fermentation Process Expert for Biopharmaceuticals Manufacturing

Responsibilities:

As a member of the MSAT Team (Manufacturing Science and Technology) in microbial Biopharmaceuticals and as a Senior Fermentation process expert, you are responsible for the transfer of processes into production. As such you are in direct contact with our clients and R&D scientists. You ensure process scalability and manufacturability. You are the person in charge for process integration related aspects during campaign preparation and you are responsible for process supervision and reporting during production campaigns. In addition you will coordinate all process relevant deviations and process adaptations and you are responsible for continuous improvement of the manufacturing processes. In this function you are reporting to the head of MSAT (line management) and with regard to product related aspects to the responsible program manager.

Requirements:

Considering the demanding task you are expected to have a degree (B.Sc., M.Sc., PhD) in Biotechnology, Biochemical Engineering or an equivalent qualification. In addition you do have several years of experience in fermentation process development and biopharmaceuticals production USP. You are well trained, driven by results and experienced in cGMP. As a team player you successfully integrate yourself into interdisciplinary teams that change team members along a product's life cycle. You are capable to keep oversight in difficult situations and you tackle emerging challenges with élan. You enjoy working for the success of our dynamic company and you already have some leadership experience. Excellent language skills in English complete your profile and knowledge of German is desirable.

Interested?

Are you interested to work in a refreshingly uncomplicated environment in a beautiful region? We look forward to meeting you and expect your application at pascal.kuonen@lonza.com For a first contact, Pascal Kuonen (+41 27 948 5530) is at your disposal.

Company Profile:

Lonza is one of the world's leading suppliers to the pharmaceutical, healthcare and life science industries. Products and services span its customers' needs from research to final product manufacture. It is the global leader in the production and support of chemical and biological active pharmaceutical ingredients. Lonza is also the world leader in microbial control providing innovative, chemistry-based and related solutions to destroy or to selectively inhibit the growth of harmful microorganisms. In addition, Lonza is a leader in cell-based research, endotoxin detection and cell therapy manufacturing. Furthermore, the company is a leading provider of value chemical and biotech ingredients to the nutrition and agro markets.

Lonza is headquartered in Basel, Switzerland and is listed on the SIX Swiss Exchange and secondary listed on the Singapore Exchange Securities Trading Limited ("SGX-ST"). In 2012, the company had sales of CHF 3.925 billion. Further information can be found at www.lonza.com.
