

Project Leader Analytical Development / Laboratory Manager – R20285

Job Description Summary

Today Lonza is a global leader in life sciences. We are more than 15,000 employees in more than 100 locations around the world. While we work in science, there's no magic formula to how we do it. Our greatest scientific solution is talented people working together, devising ideas that help businesses to help people. In exchange, we let our people own their careers. Their ideas, big and small, genuinely improve the world. And that's the kind of work we want to be part of.

For our site in Visp, Switzerland, we are currently looking for a Project Leader Analytical Development / Laboratory Manager. The main objective of the function is to carry out the analytical part of pharma development projects of chemically synthesized molecules.

Key responsibilities:

- Plans and implements the project scope in terms of clinical phase requirements and customer expectations
- Ensures timeline, cost and quality objectives of the contract are met
- Works together with other groups such as process development labs, production, QA, QC, sourcing
- Serves as primary on-site interface for customers for analytical topics regarding the technical operation and execution of the projects
- Manages the implementation, development, transfer and validation of methods, sample analysis and troubleshooting in own lab (HPLC, GC)
- Manages, develops, and supports coworkers
- Ensures safety and quality rules are followed
- Contributes to innovation and improvement of workflows

Key requirements:

- PhD in Chemistry or related field or Master Degree with relevant experience in Chemistry or related field
- Relevant knowledge of analytics in general and chromatography in detail
- cGMP, drug development, project management and statistics preferred
- Entrepreneurial, reliable, flexible, customer focus, quality focus, safety awareness, team player
- Written and oral communication in German and English

People come to Lonza for the challenge and creativity of solving complex problems and developing new ideas in life sciences. In return, we offer the satisfaction that comes with improving lives all around the world. The satisfaction that comes with making a meaningful difference.
