

Quality Assurance Systems Manager Ibex™

Today Lonza is a global leader in life sciences. We are more than 15,000 employees in more than 100 locations around the world. While we work in science, there's no magic formula to how we do it. Our greatest scientific solution is talented people working together, devising ideas that help businesses to help people. In exchange, we let our people own their careers. Their ideas, big and small, genuinely improve the world. And that's the kind of work we want to be part of.

For Ibex™ Solutions, our recently launched unique biological manufacturing and development concept in Visp, Switzerland, we have multiple openings. Become part of this exciting opportunity and join our team by applying for the position as Quality Systems Manager for the Ibex™ facilities. The Quality Systems Manager Ibex™ reports to the Quality Systems Team Leader Ibex™ and works in close collaboration with Operations to ensure alignment of Manufacturing and Support functions in executing the overall quality strategy for Ibex™. As a Quality Representative, he/she is an important member of cross-functional technical project teams.

Key responsibilities:

- Support the development and implementation of the overall quality strategy for Ibex™
- Write or revise SOPs in your area of expertise and act as owner of such documents
- Support the preparation and coordination of customer audits and health authority inspections (e.g. Swissmedic, FDA, etc.)
- Drive and coordinate activities related to raw material and supplier qualifications
- Ensure that the impact of new or revised global guidance documents on the local quality system is assessed and that appropriate measures are defined and implemented where necessary
- Create and maintain the annual training plan and act as trainer of Quality Systems processes
- Participate in the execution of Quality Risk Analyses related to raw materials (e.g. excipients)
- Act as Subject Matter Expert for Quality/ GMP compliance issues at the site
- Collect and evaluate on a regular basis KPI data suitable to assess the effectiveness of the Quality Systems

Key requirements:

- Bachelor, Master degree or PhD in Biology, Chemistry, Biotechnology, Life Science or related field
- Working experience in the GMP regulated pharmaceutical/ API industry in a Quality Assurance/ Quality Systems role
- Strong background in cGMP regulations
- Experienced with inspections and in the interaction with health authorities (e.g. Swissmedic, FDA etc.)
- Solution-oriented and strongly team-minded
- Ability to oversee project execution to identify non-compliance from quality standards
- Structured, focused and well-organized working attitude; open-minded for new ideas and suggestions
- Agile, highly motivated and dynamic drive
- Fluency in English and German

People come to Lonza for the challenge and creativity of solving complex problems and developing new ideas in life sciences. In return, we offer the satisfaction that comes with improving lives all around the world. The satisfaction that comes with making a meaningful difference.
