

Lonza

Scientist (m/f/d) - Cell Culture Development

Job Description Summary

Today, Lonza is a global leader in life sciences operating across three continents. While we work in science, there's no magic formula to how we do it. Our greatest scientific solution is talented people working together, devising ideas that help businesses to help people. In exchange, we let our people own their careers. Their ideas, big and small, genuinely improve the world. And that's the kind of work we want to be part of.

For [Ibex® Solutions](#), our recently launched unique biological manufacturing and development concept in Visp, Switzerland, we have multiple openings. To support our business continuity, we are looking for an experienced Scientist (m/f/d) in cell line construction and upstream process development. This position involves work during weekends and bank holidays. We offer a state-of-the-art work environment within an enthusiast team and attractive conditions.

Become part of this exciting opportunity and join our Mammalian Development Services team by applying for a position as a Scientist (m/f/d) in Cell Culture Development.

Key responsibilities:

- Support the Project Lead in daily cell culture activities.
- Execute experiments according to plan.
- Contribute to general laboratory tasks and media preparation.
- Contribute to problem solving and lessons learned activities.

Key requirements:

- BSc or MSc with relevant experience.
- Technical/Business English.
- Experience in cell line construction (transfections, FACS, Beacon, cryopreservation, ...).
- Experience with AMBR15/AMBR250 systems.
- Experience with stirred-tank bioreactors for mammalian cell culture is a plus.

Every day, Lonza's products and services have a positive impact on millions of people. For us, this is not only a great privilege, but also a great responsibility. How we achieve our business results is just as important as the achievements themselves. At Lonza, we respect and protect our people and our environment. Any success we achieve is no success at all if not achieved ethically.

People come to Lonza for the challenge and creativity of solving complex problems and developing new ideas in life sciences. In return, we offer the satisfaction that comes with improving lives all around the world. The satisfaction that comes with making a meaningful difference.
