

# Lonza

## Technical Project lead “Biotech” (m/f/d)

### Job Description Summary

Today, Lonza is a global leader in life sciences operating across three continents. While we work in science, there's no magic formula to how we do it. Our greatest scientific solution is talented people working together, devising ideas that help businesses to help people. In exchange, we let our people own their careers. Their ideas, big and small, genuinely improve the world. And that's the kind of work we want to be part of.

The site in Visp is growing and for [lbex™ Solutions](#), our recently launched unique biological manufacturing and development concept in [Visp, Switzerland](#), we are currently looking for a Scientist in our purification development group.

In this role, you will work hands-on in our state-of-the-art laboratories together with a high-performing, international, cross-functional team with the goal of developing and transferring scalable processes for the manufacture of novel biotherapeutics.

#### Key responsibilities:

- Responsible for the planning, the execution and documentation of project-specific downstream process development activities
- Collects, summarizes, analyses data to prepare development reports and presentations, as appropriate.
- Supports actively lab work by hands-on-work.
- Contributes to scientific field or technique by solving scientific problems within the department
- Might be responsible to manage a lab and/or electronic platform.
- Responsible for training of technicians and colleagues in his/her area.
- Evaluates and implements trends and innovations in the area of expertise to deliver better performing solutions.

#### Key requirements:

- Bachelor / Master Degree  
Preferred area of study: Biotechnology, Biochemistry or related disciplines
- MS (1-2 years industry experience); BS (> 2 years of industry experience)
- Good biotechnology expertise and/or knowledge in the area of downstream process development;
- Good leadership skills; good communication skills and interaction with all kinds of interfaces within the organization; strong team orientation
- Structured, focused and well-organized working attitude; open-minded for new ideas and suggestions; high motivation and dynamic drive; solution-oriented; willingness to support hands-on lab activities
- Excellent English and basic German is required

Every day, Lonza's products and services have a positive impact on millions of people. For us, this is not only a great privilege, but also a great responsibility. How we achieve our business results is just as important as the achievements themselves. At Lonza, we respect and protect our people and our environment. Any success we achieve is no success at all if not achieved ethically.

People come to Lonza for the challenge and creativity of solving complex problems and developing new ideas in life sciences. In return, we offer the satisfaction that comes with improving lives all around the world. The satisfaction that comes with making a meaningful difference.
