

Scientist (m/w/d) – Cell Culture Development (60%-100%)

Job Description Summary

Today, Lonza is a global leader in life sciences operating across three continents. While we work in science, there's no magic formula to how we do it. Our greatest scientific solution is talented people working together, devising ideas that help businesses to help people. In exchange, we let our people own their careers. Their ideas, big and small, genuinely improve the world. And that's the kind of work we want to be part of.

For <u>Ibex® Solutions</u>, our recently launched unique biological manufacturing and development concept in Visp, Switzerland, we have multiple openings. To support our business continuity, we are looking for an experienced Scientist in upstream process development. This position involves work during weekends and bank holidays. We offer a state-of-the-art work environment within an enthusiast team, attractive conditions and flexible working time. Become part of this exciting opportunity and join our Mammalian Development Services team by applying for a position as a Scientist in Cell Culture Development.

Key responsibilities:

- Setup, follow and execute bioreactor runs according to experimental plan.
- Contribute to problem solving and lessons learned activities.
- Support other cell culture activities such as sub-cultivation or media preparation.
- · Coordinate work for weekend and bank holidays.

Key requirements:

- Apprenticeship, BSc or MSc with several years of relevant experience.
- · Technical/Business English.
- Experience in running lab- or pilot-scale stirred-tank bioreactors for mammalian cell culture.
- Experience with AMBR15/AMBR250 is a plus.

Every day, Lonza's products and services have a positive impact on millions of people. For us, this is not only a great privilege, but also a great responsibility. How we achieve our business results is just as important as the achievements themselves. At Lonza, we respect and protect our people and our environment. Any success we achieve is no success at all if not achieved ethically.

People come to Lonza for the challenge and creativity of solving complex problems and developing new ideas in life sciences. In return, we offer the satisfaction that comes with improving lives all around the world. The satisfaction that comes with making a meaningful difference.
