

# Senior Manager, Head of Mammalian Purification Process Development

## Job Description Summary

Today Lonza is a global leader in life sciences. We are more than 15,000 employees in more than 100 locations around the world. While we work in science, there's no magic formula to how we do it. Our greatest scientific solution is talented people working together, devising ideas that help businesses to help people. In exchange, we let our people own their careers. Their ideas, big and small, genuinely improve the world. And that's the kind of work we want to be part of.

For Ibex™ Solutions ([www.ibex.lonza.com](http://www.ibex.lonza.com)), our recently launched unique biological manufacturing and development concept in [Visp](#), Switzerland, we have multiple openings. Become part of this exciting opportunity and join our team by applying for the position as **Senior Manager, Head of Mammalian Purification Process Development**.

This Senior-Management-Role is responsible for covering all chromatography and filtration purification steps. You will lead a team of scientific and process experts responsible for the successful development and optimization of protein purification processes and also be accountable for the performance and results of the assigned area including cost control. In this role you will be a member of the Mammalian Process Development Services Leadership Team.

Key responsibilities:

- Manages a team of scientific, technical experts and technicians for protein purification within the Mammalian Process Development Services with full responsibility for all aspects of human resource management
- Responsible for resource planning of the assigned team members with regard to the fulfillment of all customer projects
- Implements the Lonza culture via openness for change and new ideas, cooperative teamwork and continuous improvement
- Responsible for the organization, technical assessment, cost control and prioritization of the work to perform the assigned process development programs
- Ensures that the groups deliver high quality development services to customers within the agreed timelines
- Responsible for developing cost efficient processes and running improvement programs to reduce cost and increase throughput through Operational Excellence and Innovation initiatives
- Fosters an innovation culture in his/her department and anticipates, evaluates and implements technical innovations and trends

Key requirements:

- Master or PhD degree in relevant field of expertise (biotechnology, chemical engineering, protein chemistry)
- Experience in biopharma process development, preferably in the area of mammalian purification development and manufacturing
- Broad and deep understanding of protein purification, good understanding of business and financial processes
- Strong leadership skills, excellent communication skills, networking skills, ability to engage customers to develop positive relationships, strong team orientation
- Structured, focused and well-organized work attitude, open-minded for new ideas and suggestions, agile, highly motivated and dynamic drive, solution-oriented

Every day, Lonza's products and services have a positive impact on millions of people. For us, this is not only a great privilege, but also a great responsibility. How we achieve our business results is just as important as the achievements themselves. At Lonza, we respect and protect our people and our environment. Any success we achieve is no success at all if not achieved ethically.
