

Senior Teamlead Operations mRNA (m/f/d)

Job Description Summary

Today, Lonza is a global leader in life sciences operating across three continents. While we work in science, there's no magic formula to how we do it. Our greatest scientific solution is talented people working together, devising ideas that help businesses to help people. In exchange, we let our people own their careers. Their ideas, big and small, genuinely improve the world. And that's the kind of work we want to be part of.

Ibex® Solutions (www.ibex.lonza.com) is a modular build complex to develop and manufacture biological products. It enables companies to get access to a complete solution, gaining speed and achieving a simplified value chain.

The Ibex® Complex is our contribution to the medicine of tomorrow and possibly the next step in your career? Start your career with Lonza today.

A Senior Teamlead Operations in mRNA manufacturing is a functional lead for an interdisciplinary team of bioprocess engineers and specialists. Manages and support the operational activities of a manufacturing unit with regard to safety, quality and on-time-in full delivery. Is accountable for the performance, results of the assigned area.
