

## Supply Chain Logistics Growth Project lead - Kujira

### Job Description Summary

Today, Lonza is a global leader in life sciences operating across three continents. While we work in science, there's no magic formula to how we do it. Our greatest scientific solution is talented people working together, devising ideas that help businesses to help people. In exchange, we let our people own their careers. Their ideas, big and small, genuinely improve the world. And that's the kind of work we want to be part of.

This role is responsible to define, coordinate, and deliver the Supply Chain (SC) activities needed to support the on time in full delivery of the assigned growth projects with the main focus on setting up all SAP master data for the new products, clarifying customer demand, creating a master production schedule (MPS) and purchasing the materials needed for qualification and commercial manufacturing. Develop the SC operational readiness plan in conjunction with the Operational Readiness Planner, Procurement (direct and indirect) and Logistics teams

#### Key responsibilities:

- Actively represent SC in leadership meetings, internal project team and joint project team meetings reporting progress and managing escalations
- Define the future SC organization (Roles and #FTEs based on the SC blueprint), hiring plan and support the hiring activities
- Work with CQV, PQ, MSAT and Procurement (direct and indirect) teams to support the use of standard Lonza materials in the CQV and PQ activities
- Ensure on time in full delivery of CQV, PQ and commercial manufacturing materials under the responsibility of the SC team with minimum impact to inventory
- Actively participate in the RM gap assessment process with the end goal of creating the SAP BOMs for the new products
- Request and complete the creation of SAP part numbers for raw material, semi-finished goods, and finished goods
- Define and update the Master Production Schedule (MPS) in SAP based on the demand planning and operations inputs.
- Ensure the placement of the purchase orders to vendors based on the SAP driven MPS/MRP plan through the relevant MRP Planners
- Conduct BOM review meetings with MSAT, Ops and SC planning team after manufacturing of developmental runs up to the 1st commercial batch to ensure an accurate SAP BOM
- Be the liaison between SC planning, procurement, plant and site logistics providing clarity on the 3-5 year material requirements, type of material and BDS carriers, and number of required pallet spaces

#### Key requirements:

- Master Degree in Supply Chain or Business Administration, CPIM APICS preferred strong background within Biotech / CDMO / Pharma industry Fluent in both German and English (mandatory)
- Ability to influence both Supply Chain and functional leaders to support supply planning and site manufacturing strategy recommendations Good communication and presentation skills.
- Ability to present ideas in a clear and concise manner Strong analytical skills with the ability to define metrics (KPI's) and identify issues through root cause analysis Proficient in using MS Office suite, particularly Excel and PowerPoint as well as SAP Ability to utilise Business Intelligence systems to extract data and generate reports Very experienced in leading a team and driving their performance and development

# Lonza

Every day, Lonza's products and services have a positive impact on millions of people. For us, this is not only a great privilege, but also a great responsibility. How we achieve our business results is just as important as the achievements themselves. At Lonza, we respect and protect our people and our environment. Any success we achieve is no success at all if not achieved ethically.

People come to Lonza for the challenge and creativity of solving complex problems and developing new ideas in life sciences. In return, we offer the satisfaction that comes with improving lives all around the world. The satisfaction that comes with making a meaningful difference.
