

Lonza

Teamlead Biotechnologist (m/w/d)

Job Description Summary

Today Lonza is a global leader in life sciences. We are more than 15,000 employees in more than 100 locations around the world. While we work in science, there's no magic formula to how we do it. Our greatest scientific solution is talented people working together, devising ideas that help businesses to help people. In exchange, we let our people own their careers. Their ideas, big and small, genuinely improve the world. And that's the kind of work we want to be part of.

The site in Visp is growing and for our recently launched unique biological manufacturing and development concept in [Visp, Switzerland](#), we are currently looking for a Teamleader Biotechnologists to manage and support the operational activities of a Microbial small-scale manufacturing unit and be accountable for the execution of all production campaigns with regard to safety, quality and on-time-in full delivery. As member of the Manufacturing Leadership Team, you will be responsible for the performance and results of the assigned area, as well for set-up and management of the training activities in the operations unit. Become part of this exciting opportunity and apply now!

Key responsibilities:

- Manages a team of manufacturing biotechnologists, with full responsibility for all aspects of human resource management such as qualification, development, training, coaching, hiring, pay decisions and discipline issues.
- Ensures a good information exchange from the Manufacturing Leadership Team to his/her team and the other way around through regularly team meetings and escalation of production issues.
- Implements the LONZA culture via openness for change and new ideas, cooperative teamwork and continuous improvement even outside his/her own area of responsibility
- Responsible for implementation of the relevant GMP documents for the respective area.
- Representing the operational area in customer meetings, audits and regulatory inspections.
- Deputy of the head of production of small scale-manufacturing plant during his/her absence.

Key requirements:

- Bachelor or Master degree in Biotechnology, Biology, Chemical Engineering or related disciplines;
- 5 years of experience in biotechnical or chemical manufacturing, preferably in leadership positions (e. g. production biologist / chemist, MSAT expert, engineering
- Deep Knowledge in GMP
- Very good communication skills and interaction with all kinds of interfaces within the organization
- Structured, focused and well-organized working attitude
- Fluent in both German and English

Lonza

Every day, Lonza's products and services have a positive impact on millions of people. For us, this is not only a great privilege, but also a great responsibility. How we achieve our business results is just as important as the achievements themselves. At Lonza, we respect and protect our people and our environment. Any success we achieve is no success at all if not achieved ethically.

People come to Lonza for the challenge and creativity of solving complex problems and developing new ideas in life sciences. In return, we offer the satisfaction that comes with improving lives all around the world. The satisfaction that comes with making a meaningful difference.
