

Lonza

Technical & GMP Trainer 50-100% (f/m/d)

Job Description Summary

Today Lonza is a global leader in life sciences operating across three continents. While we work in science, there's no magic formula to how we do it. Our greatest scientific solution is talented people working together, devising ideas that help businesses to help people. In exchange, we let our people own their careers. Their ideas, big and small, genuinely improve the world. And that's the kind of work we want to be part of.

Ibex® Solutions (www.ibex.lonza.com) is a modular build complex to develop and manufacture biological products. It enables companies to get access to a complete solution, gaining speed and achieving a simplified value chain. The Ibex® Complex is our contribution to the medicine of tomorrow and possibly the next step in your career? Start your career with Lonza today. Apply as Technical & GMP Trainer!

The Technical & GMP Trainer reports into the Head of Training Biologics Operations and is responsible for developing and delivering technical and GMP related trainings at Biologics Operations in Visp. This is accomplished by continuously improving the training programs in collaboration with the site training team and ensuring that training programs fulfill quality and business needs. In addition, this role works closely with Biologics Operations project teams and centers of competence for training at various Lonza sites. The role will coach and mentor trainees in an informal leadership capacity and is a role model within the organization, understanding and promoting GMP mindset and behaviors that drive a safety & quality culture.

Key responsibilities:

- Responsible for effective and efficient training of Biologics Operations staff from operator level up to scientist level supported by the local training infrastructure.
- Provide training in classroom and shop floor settings, including assessment and documentation of trainees' competencies and qualifications.
- Supports developing training programs as well as related material to suit training of different levels.
- Liaises with according Biologics Operations team to ensure training programs align with quality and business goals and support functional objectives.
- Perform other duties as assigned

Key requirements:

- Bachelor or Master in Biologics , Biotechnology, Life Science or related working experiences
- Previous experience in GMP regulated pharmaceutical
- Training expert in scientific or technical environment
- Ability to identify non-compliance and gaps from quality standards
- Structured, precise and well-organized working attitude; open-minded for new ideas and suggestions; agile, highly motivated and dynamic drive
- German and English good command are required

Every day Lonza's products and services have a positive impact on millions of people. For us, this is not only a great privilege, but also a great responsibility. How we achieve our business results is just as important as the achievements themselves. At Lonza, we respect and protect our people and our environment. Any success we achieve is no success at all if not achieved ethically.

People come to Lonza for the challenge and creativity of solving complex problems and developing new ideas in life sciences. In return, we offer the satisfaction that comes with improving lives all around the world. The satisfaction that comes with making a meaningful difference.
