

Upstream Senior Process Expert MSAT - Mammalian Large-Scale (m/f/d)

Job Description Summary

Today, Lonza is a global leader in life sciences operating across three continents. While we work in science, there's no magic formula to how we do it. Our greatest scientific solution is talented people working together, devising ideas that help businesses to help people. In exchange, we let our people own their careers. Their ideas, big and small, genuinely improve the world. And that's the kind of work we want to be part of.

For Ibex™ Solutions (www.ibex.lonza.com), our unique biological manufacturing and development concept in Visp, Switzerland, we have multiple openings. Become part of this exciting opportunity and join our team by applying for the position as MSAT (Manufacturing Science and Technology) Process Expert MSAT - Mammalian Large-Scale where you will be responsible for the successful transfer, scale up, supervision and optimization of biopharma processes. In this role, you significantly contribute to the development of the MSAT toolbox and share the manufacturing responsibility as a long-term process owner.

Key Responsibilities

- Leading cross functional teams tasked with technology transfers (process design and up-scaling) and timely process implementation at manufacturing scale
- Solving process issues that may arise during manufacturing and executing risk analysis for the manufacturing processes
- Implementing the manufacturing process in the plant and timely compilation of process related deviations, change requests and campaign reports
- Interacting directly with customers during tech transfer, campaign preparation, execution and closure including daily reporting of batch status and performance
- Contributing to the development and implementation of standardized MSAT procedures and processes
- Evaluating and driving innovative trends and process improvements within the respective area of expertise
- Acting as mentor for scientific and production staff in different fields of expertise

Key Requirements

- PhD (preferred), Master's/Master's degree in biotechnology, chemical engineering or related disciplines
- Substantial working experience in biopharma manufacturing and / or process development preferable in of Mammalian Manufacturing
- Deep understanding of GMP, cell culture upstream process and bioprocess technology
- Very good communication skills and interaction with all kinds of interfaces within customers and the project organization
- Fluency in English

Every day, Lonza's products and services have a positive impact on millions of people. For us, this is not only a great privilege, but also a great responsibility. How we achieve our business results is just as important as the achievements themselves. At Lonza, we respect and protect our people and our environment. Any success we achieve is no success at all if not achieved ethically.

People come to Lonza for the challenge and creativity of solving complex problems and developing new ideas in life sciences. In return, we offer the satisfaction that comes with improving lives all around the world. The satisfaction that comes with making a meaningful difference.
